Circular Needle Holder

Any worsted weight yarn
# 8 dpns

CO 4 sts leaving 6 inch tail.

Make an I-cord 12' long.

Bind off.

Using 6" tail, form a lop by wrapping tail
around tail weaving into cord. Weave in
remaining cord.

Push circular needles between sts in I-
cord and allow to hang centered.

For larger needles, use an unbent paper clip. Thread upper end of paper clip vertically into
cord and squeeze together. Hang circular needle from lower end of clip.

I hung the holder from the loop on my wall with a push pin. This will keep the cable on the
circular needles straighter.
